PROFESSIONAL SUMMARY

Generative AI & Automation Engineer with live project experience at Mastek and Dev IT Simplified Ltd delivering Agentic AI systems, LangGraph multi-agent workflows, RAG pipelines, LLM fine-tuning, Knowledge Graph design, and enterprise automation. Built production systems integrated with Oracle HCM APIs, ServiceNow, and Microsoft platforms achieving 85% agent helpfulness rating across 136 live resolutions. Proficient in Prompt Engineering, multi-agent orchestration, and intelligent document processing. Targeting AI Engineer, GenAI Developer, and Automation Engineer roles at top technology firms.

EXPERIENCE

AI Intern — Agentic AI & Automation | Mastek *Aug 2025 – Present*

- Built Resolution AI — a LangGraph-orchestrated multi-agent ITSM system integrated with ServiceNow that retrieves knowledge from Oracle web docs, KB articles, and past resolved tickets in parallel, reducing Oracle incident diagnosis from 20–40 minutes to 30–60 seconds with 85% agent helpfulness rating across 136 live resolutions.
- Implemented a Knowledge Graph for the Managed Services domain — designed entities, relationships, and ontologies integrated into a RAG pipeline to enhance AI agent contextual reasoning and enterprise knowledge retrieval.
- Curated and built LLM fine-tuning datasets from historical ITSM support tickets and enterprise logs to train domain-adapted models for ticket classification and automated resolution.
- Developed end-to-end HR Intelligence System integrating Oracle HCM REST APIs — enabling AI-driven role assignment, role removal, access control, password reset, onboarding, and offboarding via natural language with agentic function-calling workflows.
- Built Smart Hire — a production-grade AI recruitment platform with LLM resume parsing (structured profiles in under 10 seconds), BM25 + semantic shortlisting, LLM-ranked candidate scoring across 5 weighted dimensions, AI voice interviews via Twilio TTS, and proctored assessments with MediaPipe face detection.
- Developed Resolution AI Dashboard — a React and Node.js analytics interface on Azure with real-time MTTR KPIs, batch ticket indexing, and XLSX export; deployed via GitHub Actions CI/CD with under 1.5s load time.

AI & Automation Intern | Dev IT Simplified Ltd *Feb 2025 – Aug 2025*

- Automated 5 enterprise workflows using Microsoft Power Automate cutting manual processing by ~70%; implemented OCR pipelines via Azure Form Recognizer and Python Tesseract for structured data extraction from scanned documents.
- Built AI chatbot systems using FastAPI, LangChain, and HuggingFace for enterprise document Q&A; contributed to Microsoft Copilot Agent initiative for service ticket resolution.

KEY PROJECTS

Multi-Agent AI Research Analyst - Python, LangGraph, CrewAI, FastAPI, Tavily Search, PostgreSQL, Azure OpenAI

- Built a multi-agent AI research system using LangGraph orchestration where planner, retriever, verifier, and summarizer agents collaboratively generate source-grounded research reports with contextual reasoning and web retrieval.
- Implemented hybrid RAG pipelines with semantic search, memory-aware workflows, and automated report generation for real-time trend analysis and business intelligence insights.

Autonomous AI Code Review & Refactoring Platform - Python, FastAPI, LangChain, OpenAI APIs, AST Parsing, React

- Developed an AI-powered code review platform that detects bugs, security vulnerabilities, performance issues, and code-quality violations using LLM reasoning combined with static code analysis and AST parsing.
- Built repository-aware semantic code search and automated refactoring workflows generating contextual fix suggestions, code scoring, and optimization recommendations across multi-file projects.

TECHNICAL SKILLS

Generative AI & Agentic AI: LLMs, RAG, Agentic Workflows, Multi-Agent Orchestration, Prompt Engineering, LangChain, LangSmith, Function Calling, LLM Fine-Tuning

Knowledge & Data: Knowledge Graphs, Ontology Design, Neo4j, Fine-Tuning Dataset Curation, Data Annotation, Vector Embeddings

AI/ML Libraries: HuggingFace, Scikit-learn, Pandas, NumPy, TensorFlow, PyTorch, SpaCy, NLTK, BERT, T5

Automation & Platforms: Microsoft Power Automate, Power Apps, Microsoft Copilot Studio, Azure Form Recognizer, ServiceNow, Oracle HCM APIs

Frameworks & APIs: FastAPI, REST APIs, Oracle HCM REST APIs, Node.js, Express.js, Django (basic)

Databases & Vector DBs: Pinecone, PostgreSQL, MongoDB, SQLite, MySQL, Azure Cosmos DB

Cloud & DevOps: AWS (basic), Docker (basic), Git, GitHub, LangSmith, LLM Evaluation, Model Monitoring

Programming: Python, SQL, JavaScript, Java

SOFT SKILLS

Strong Analytical Thinking • Quick Learner • Prompt Engineering Mindset • Cross-Functional Collaboration • Technical Documentation • Problem Solving • Attention to Detail • Self-Driven & Highly Motivated • Adaptability • Effective Communication

EDUCATION

B.E. Computer Science & Engineering — L.J. Institute of Engineering & Technology, Ahmedabad

2022 – 2026

Relevant Coursework: Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Computer Networks, DBMS

CERTIFICATIONS (SELECTED)

Machine Learning with Python – IBM (2026) • Building Generative AI Powered Applications with Python – IBM (2025) • AWS Cloud Technical Essentials – AWS (2025) • Supervised Machine Learning – DeepLearning.AI (2025) • Google AI Essentials – Google (2024) • Cybersecurity Attacks & Defense Fundamentals – EC Council (2025)

ADDITIONAL INFORMATION

Open to Relocate: Bengaluru, Hyderabad, Pune, Mumbai | **Languages:** English (Professional Working Proficiency) • Hindi (Fluent) • Gujarati (Native)
