SUMMARY

Passionate Computer Science professional with strong analytical mindset and hands-on experience in AI, data analysis, and web development. Currently working as an AI Intern at Mastek Limited, where I apply programming expertise in Python, SQL, and JavaScript to solve real-world business challenges. My academic foundation combined with practical project experience in data processing, automation, and full-stack development positions me well for leveraging analytics tools like Google Analytics to drive data-driven insights and business growth.

EXPERIENCE

AI Intern | Mastek Limited | August 2024 - Present

- Currently contributing to AI-driven projects while gaining hands-on experience in data analysis and machine learning implementations
- Working with cross-functional teams to develop innovative solutions using Python, SQL, and various AI frameworks
- Applying analytical thinking to process and interpret data patterns for business decision-making
- Collaborating in an agile environment to deliver high-quality technical solutions on time

PROJECTS

SkillSwap | Full-Stack Web Application | [LINK](#)

- Developed a comprehensive web platform enabling users to create profiles, showcase skills, and connect with others through an intelligent matching system
- Built robust backend using Node.js, Express.js, and MongoDB with frontend in React.js, demonstrating full-stack development capabilities essential for understanding web analytics implementation
- Implemented user tracking and notification systems, providing insights into user behavior patterns similar to analytics workflows
- Managed version control using Git and handled database operations that mirror data collection and analysis processes

AI Agent (Twitter Automated Tweet) | [LINK](#)

- Created an intelligent automation tool using Node.js that generates and publishes engaging social media content through API integrations
- Leveraged Together AI's LLaMA 3.3-70B model and Twitter API V2 to build data-driven content generation pipeline
- Implemented secure API key management and real-time data processing, skills directly applicable to Google Analytics API integrations

- Built analytics-friendly features with prompt engineering techniques to optimize engagement metrics (30-50 word optimization)

Drug Recommendation System | Currently in Development

- Developing a multi-modal recommendation engine that processes text, voice, and image inputs to provide intelligent suggestions
- Working with a curated dataset of 11,000+ drug records, demonstrating experience with large-scale data analysis and pattern recognition
- Building user-friendly interface with multi-language support (English/Hindi), showcasing understanding of user experience optimization
- Implementing data-driven recommendation algorithms that parallel the analytical thinking required for Google Analytics insights

EDUCATION

Bachelor of Technology in Computer Science and Engineering - AI
Parul Institute of Engineering and Technology | Vadodara, Gujarat
GPA: 8.41 | September 2022 - April 2026

Higher Secondary School Certification
V.D. Galiyara High School | Surat, Gujarat
Percentage: 60.33% | June 2020 - March 2022

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, JavaScript, HTML, CSS
Frameworks & Libraries: React.js, Express.js, Pandas, NumPy, Node.js
Data & Analytics Tools: MongoDB, MongoDB Compass, Microsoft Excel, PowerPoint
Development Environment: Visual Studio Code, Google Colab, GitHub, Postman
Problem-Solving Platforms: LeetCode, HackerRank, CodeChef
Core Competencies: Data Analysis, API Integration, Database Management, Web Development, Automation

SOFT SKILLS

Leadership, Analytical Thinking, Team Collaboration, Effective Communication, Time Management, Strong Work Ethic, Problem-Solving

CERTIFICATIONS & ACHIEVEMENTS

Microsoft Azure AI Fundamentals | [LINK](#)

- Gained comprehensive understanding of AI technologies including Generative AI, Computer Vision, and Natural Language Processing
- Developed expertise in machine learning concepts that enhance analytical thinking for data interpretation

Google Cloud Skill Badges | [LINK](#)

- Mastered Large Language Models and Prompt Design in Vertex AI, directly relevant to Google's analytics ecosystem
- Acquired knowledge of image processing and encoder-decoder architectures, strengthening technical foundation for data analysis

Problem Solving Excellence | [LINK](#)

- Consistently solved complex data structure problems across multiple platforms (LeetCode, CodeChef, HackerRank)
- Optimized algorithms for time and space complexity, developing analytical skills essential for performance analytics
- Enhanced pattern recognition abilities crucial for identifying trends and insights in analytics data
